LIST OF CONTENTS

Number 1

A. Uribe-Salas, C. O. Gomez and J. A. Finch	1	A conductivity technique for gas and solids holdup determination in three-phase reactors
A. Balakrishna, L. D. Schmidt and R. Aris	11	Pt-catalyzed combustion of CH_4–C_3H_8 mixtures
A. Cybulski and J. A. Moulijn	19	Modelling of heat transfer in metallic monoliths consisting of sinusoidal cells
H. C. J. Hoefsloot, L. P. B. M. Janssen and H. W. Hoogstraten	29	Marangoni convection around a ventilated air bubble under microgravity conditions
L. Zhang and N. A. Seaton	41	The application of continuum equations to diffusion and reaction in pore networks
D. M. Ruthven and S. Farooq	51	Concentration of a trace component by pressure swing adsorption
Y. Touré, J. Biston and G. Gilles	61	Modeling of a distributed parameter process with a variable boundary: application to its control
C.-T. Chou and W.-C. Huang	75	Incorporation of a valve equation into the simulation of a pressure swing adsorption process
S. Palanki, C. Kravaris and H. Y. Wang	85	Optimal feedback control of batch reactors with a state inequality constraint and free terminal time
J. Alvarez, Jo. Alvarez and M. Hernández	99	A population balance approach for the description of particle size distribution in suspension polymerization reactors
J. Słoczyński	115	Antisintering criteria in the metal–spacer catalytic system
Gh. Juncu, S. Bildea and O. Floarea	123	Steady-state multiplicity analysis of the heterogeneous axial dispersion fixed-bed reactor
C. Tablino Possio and L. Pellegrini	131	An example of type III intermittency in chemical engineering
		Shorter Communications
K. B. Kushalkar and V. G. Pangarkar	139	Particle–liquid mass transfer in a bubble column with a draft tube
R. C. Brown	145	The pore size distribution of model filters produced by random fragmentation described in terms of the Weibull distribution
J. Zhu and Q. Deng	147	Non-Newtonian flow past a swarm of Newtonian droplets

Number 2

	v	Eighth P. V. Danckwerts Memorial Lecture
M. D. Lilly	151	Eighth P. V. Danckwerts Memorial Lecture presented at Glaziers' Hall, London, U.K., 13 May 1993: Advances in biotransformation processes

F. Durst, U. Lange and H. Raszillier 161 Optimization of distribution chambers of coating facilities

M. R. Mackley and N. E. Sherman 171 Cross-flow filtration with and without cake formation

R. Gutsche and H. Yoshida 179 Solid diffusion in the pores of cellulose membrane

J. Li and O. Talu 189 Adsorption equilibrium of benzene–*p*-xylene vapor mixture on silicalite

Y. H. Wong, P. R. Krishnaswamy, W. K. Teo, B. D. Kulkarni and P. B. Deshpande 199 Experimental application of robust nonlinear control law to pH control

A. Coteron and A. N. Hayhurst 209 Kinetics of the synthesis of methanol from $CO + H_2$ and $CO + CO_2 + H_2$ over copper-based amorphous catalysts

S. Dasappa, P. J. Paul, H. S. Mukunda and U. Shrinivasa 223 The gasification of wood-char spheres in CO_2–N_2 mixtures: analysis and experiments

G. R. Duursma, J. R. Ockendon and S. J. Hogan 233 Obstacle-induced voids in two-dimensional gas fluidized beds

P. D. Deepak and S. K. Bhatia 245 Transport in capillary network models of porous media: theory and simulation

C. M. Smith and P. E. Savage 259 Reactions of polycyclic alkylaromatics—VI. Detailed chemical kinetic modeling

G. Akay and R. J. Wakeman 271 Crossflow microfiltration behaviour of a double-chain cationic surfactant dispersion in water—I. The effect of process and membrane characteristics on permeate flux and surfactant rejection

Number 3

Z. H. Yu, W. Li, J. H. Lee and M. Morari 285 State estimation based model predictive control applied to shell control problem: a case study

P. Ayazi Shamlou, D. J. Pollard, A. P. Ison and M. D. Lilly 303 Gas holdup and liquid circulation rate in concentric-tube airlift bioreactors

C.-H. Chang and E. I. Franses 313 Dynamic tension behavior of aqueous octanol solutions under constant-area and pulsating-area conditions

K. G. Ayappa, E. A. Abraham, H. T. Davis, E. A. Davis and J. Gordon 327 Influence of sample width on deducing capillary pressure curves with the centrifuge

P. L. Silveston, R. R. Hudgins, S. Bogdashev, N. Vernijakovskaja and Yu. Sh. Matros 335 Modelling of a periodically operating packed-bed SO_2 oxidation reactor at high conversion

G. Li, H. Rabitz and J. Tóth 343 A general analysis of exact nonlinear lumping in chemical kinetics

Y. H. Chan and D. L. S. McElwain 363 Conversion estimates for gas–solid reactions: reversible kinetics independent of solid concentrations

L. M. Sun, F. Meunier, Ph. Grenier and D. M. Ruthven 373 Frequency response for nonisothermal adsorption in biporous pellets

R. Konnur and S. Pushpavanam 383 The dynamics of a fed-batch reactor: the transition from the batch to the CSTR

D. Arnošt and **P. Schneider** 393 Effective diffusivities from dynamic diffusion cell: the general moments analysis

O. Šolcová and **P. Schneider** 401 Axial dispersion in single-pellet-string columns packed with cylindrical particles

H. Sovová 409 Rate of the vegetable oil extraction with supercritical CO_2—I. Modelling of extraction curves

H. Sovová, J. Kučera and **J. Jež** 415 Rate of the vegetable oil extraction with supercritical CO_2—II. Extraction of grape oil

Shorter Communication

K. S. Lim and **P. K. Agarwal** 421 Circulatory motion of a large and lighter sphere in a bubbling fluidized bed of smaller and heavier particles

Letters to the Editors

H. Linde, M. G. Velarde, M. Hennenberg and **X. L. Chu** 425 Comments on interfacial instabilities: the Linde instability

W. G. Laidlaw 426 Author's reply to comments by H. Linde *et al.*

Book Reviews

S. A. Klein 429 Numerical Simulations of Heat Transfer and Fluid Flow on a Personal Computer. By S. Kotake and K. Hijikata

A. Andren 429 Groundwater Contamination and Analysis at Hazardous Waste Sites. Edited by S. Lesage and R. Jackson

J. M. Davidson 430 Homogeneous Catalysis. The Applications and Chemistry of Catalysis by Soluble Transition Metal Complexes. By G. W. Parshall and S. D. Ittel

S. Kim 431 Bubbles, Drops, and Particles in Non-Newtonian Fluids. By R. P. Chhabra

Number 4

P. Daoutidis and **C. Kravaris** 433 Dynamic output feedback control of minimum-phase multivariable nonlinear processes

R. J. Grau and **H. J. Cantero** 449 A systematic time-, space- and time–space-averaging procedure for bulk phase equations in systems with multiphase flow

D. Heitzmann, J. A. Dodds and **H. Berthiaux** 463 De-agglomeration of pigments: from batch to continuous

A. K. Ray, R. W. Carr and **R. Aris** 469 The simulated countercurrent moving bed chromatographic reactor: a novel reactor–separator

S. Hocq, J.-F. Milot, C. Gourdon and **G. Casamatta** 481 Electrical conductivity capillary technique: a new method for bivariate drop-size–concentration distribution measurements

M. R. P. F. N. Costa and **R. C. S. Dias** 491 A general kinetic analysis of non-linear irreversible copolymerizations

P. Brandani, S. Brandani, V. Brandani and **G. Del Re** 517 Equation of state for mixtures containing polar compounds

D. Tsamatsoulis and **N. Papayannakos** 523 Axial dispersion and hold-up in a bench-scale trickle-bed reactor at operating conditions

R.-Q. Li, A. E. Wraith and **R. Harris** 531 Gas dispersion phenomena at a narrow slot submerged in a liquid

M. Giona, A. Adrover, D. Barba and **D. Spera** 541 Simplified analysis of chromatographic-column dynamics

L. Dong, S. T. Johansen and **T. A. Engh** 549 Flow induced by an impeller in an unbaffled tank—I. Experimental

P. A. Addison, B. A. Buffham, G. Mason and **G. D. Yadav** 561 Gas-phase dispersion assessed from tracer holdup measurements on a packed bed: theory, apparatus and experimental test (or how to measure dispersion with a pressure gauge)

Number 5

SPECIAL ISSUE: FESTSCHRIFT FOR PROFESSOR GIANNI ASTARITA

R. Ocone 573 Editorial

575 List of publications

R. Aris 581 "Almost discrete" Γ-distributed chemical species and reactions

S. Benthin, U. Schulze, J. Nielsen and **J. Villadsen** 589 Growth energetics of *Lactococcus cremoris* FD1 during energy-, carbon-, and nitrogen-limitation in steady state and transient cultures

S. Brandani and **P. U. Foscolo** 611 Analysis of discontinuities arising from the one-dimensional equations of change for fluidization

P. Cicarelli and **R. Aris** 621 Continuous reactions in a non-isothermal CSTR—I. Multiplicity of steady states

M. A. Del Nobile, G. Mensitieri, P. A. Netti and **L. Nicolais** 633 Anomalous diffusion in poly-ether-ether-ketone

I. Devotta, V. D. Ambeskar, A. B. Mandhare and **R. A Mashelkar** 645 The life time of a dissolving polymeric particle

D. A. Hill, M. M. Denn and **M. Q. Salmeron** 655 Post-fracture analyses of polyethylene–metal interfaces

N. S. Kalospiros and **M. E. Paulaitis** 659 Molecular thermodynamic model for solvent-induced glass transitions in polymer–supercritical fluid systems

M. Masi, G. Besana, L. Canzi and **S. Carrà** 669 Modeling of silicon nitride deposition by RF plasma-enhanced chemical vapor deposition

M. Mazzotti, G. Serravalle and **M. Morbidelli** 681 Belousov–Zhabotinskii oscillations in a batch reactor

J. H. Meldon and **A. Dutta** 689 Analysis of ultimate permselectivity for H_2S over CO_2 in alkaline solutions

P. Moldenaers, M. Mortier and **J. Mewis** 699 Transient normal stresses in lyotropic liquid crystalline polymers

J. A. Ochoa-Tapia, P. Stroeve and **S. Whitaker** 709 Diffusive transport in two-phase media: spatially periodic models and Maxwell's theory for isotropic and anisotropic systems

J. R. A. Pearson 727 Two-phase models for complex fluid phenomena: some examples

G. C. Sarti and **F. Doghieri** 733 Non-Fickian transport of alkyl alcohols through pre-stretched poly-methylmethacrylate

P. Townsend and **K. Walters** 749 Expansion flows of non-Newtonian liquids

S. Whitaker 765 The closure problem for two-phase flow in homogeneous porous media

B. S. White, T. C. Ho and **H. Y. Li** 781 Lumped kinetics of many irreversible bimolecular reactions

Shorter Communication

F. Gioia, A. Soddu, P. J. Russo and **M. Albanesi** 797 The dynamics of aroma and oxygen on the opening of vacuum-sealed flexible film bags containing ground foodstuff

Number 6

A. G. Pedersen, H. Andersen, J. Nielsen and **J. Villadsen** 803 A novel technique based on ^{85}Kr for quantification of gas–liquid mass transfer in bioreactors

L. Chen and **H. Weinstein** 811 Measurement of normal stress and hindrance factor in a collapsing fluidized bed

T. I. Mizan, J. Li, B. I. Morsi, M.-Y. Chang, E. Maier and **C. P. P. Singh** 821 Solubilities and mass transfer coefficients of gases in liquid propylene in a surface-aeration agitated reactor

Yanxiang Wu 831 An analysis of constant-pressure filtration

G. Hillmer, L. Weismantel and **H. Hofmann** 837 Investigations and modelling of slurry bubble columns

R. G. Rice, L. F. Burns and **R. S. Miao** 845 Effect of gas diluents on assessment of kinetics in pressure response cells

R. A. Kuyper, Th. H. van der Meer and **C. J. Hoogendoorn** 851 Turbulent natural convection flow due to combined buoyancy forces during underground gasification of thin coal layers

J. G. H. Borkink and **K. R. Westerterp** 863 Significance of the radial porosity profile for the description of heat transport in wall-cooled packed beds

D. V. Prasad Naidu, R. Rajan, R. Kumar, K. S. Gandhi, V. H. Arakeri and **S. Chandrasekaran** 877 Modelling of a batch sonochemical reactor

S. Rode, N. Midoux, M. A. Latifi, A. Storck and **E. Saatdjian** 889 Hydrodynamics of liquid flow in packed beds: an experimental study using electrochemical shear rate sensors

A. I. Alonso, A. M. Urtiaga, A. Irabien and **M. I. Ortiz** 901 Extraction of Cr(VI) with Aliquat 336 in hollow fiber contactors: mass transfer analysis and modeling

Shorter Communications

K. Ohgaki, Y. Makihara and **H. Sangawa** 911 Effect of exposure to magnetism on crystals produced in aqueous solutions

D. M. Scott 914 The linear driving force model for cyclic adsorption and desorption: the effect of shape

E. Iritani, Y. Murakami and T. Murase — 917 Analysis of flow of power-law non-Newtonian fluids in hollow fiber membrane modules

X. Hu and D. D. Do — 919 Effect of energy distribution shape on the sorption equilibrium and dynamics of SO_2 in activated carbon

D. Browarzik and H. Kehlen — 923 Hydrocracking process of *n*-alkanes by continuous kinetics

Number 7

B. M. Wagenaar, J. A. M. Kuipers and W. P. M. van Swaaij — 927 Particle dynamics and gas-phase hydrodynamics in a rotating cone reactor

A. Converti, C. Sommariva and M. Del Borghi — 937 Transient responses in systems with cells immobilized within large-pore matrices

V. S. Saraph and A. Mehra — 949 Microphase autocatalysis: importance of near interface effects

R. G. Jordi and D. D. Do — 957 Analysis of the frequency response method applied to non-isothermal sorption studies

Y. P. Wang and R. Smith — 981 Wastewater minimisation

M. Trela — 1007 A semi-theoretical model of stability of vertical falling liquid films

Ş. Ungureanu, C. Petrila, A. Mareş and H. Rabitz — 1015 Elementary sensitivity of a chemical reactor described by a quasihomogeneous bidimensional model

D. J. Smit, M. J. Hounslow and W. R. Paterson — 1025 Aggregation and gelation—I. Analytical solutions for CST and batch operation

A. C. Kokossis and C. A. Floudas — 1037 Optimization of complex reactor networks—II. Non-isothermal operation

B. W. Brooks and H. N. Richmond — 1053 Phase inversion in non-ionic surfactant–oil–water systems—I. The effect of transitional inversion on emulsion drop sizes

B. W. Brooks and H. N. Richmond — 1065 Phase inversion in non-ionic surfactant–oil–water systems—II. Drop size studies in catastrophic inversion with turbulent mixing

Letter to the Editors

J. R. Bourne and J. Baldyga — 1077 Drop breakup in the viscous subrange: a source of possible confusion

1079 Corrigenda

1081 Announcement

Number 8

M. A. Hjortso and J. Nielsen — 1083 A conceptual model of autonomous oscillations in microbial cultures

O. D. S. Mota, A. M. F. R. Pinto and J. B. L. M. Campos — 1097 Fluidised-bed combustion of a charge of coke with a wide distribution of particle sizes

O. E. Jensen, D. Halpern and J. B. Grotberg	1107	Transport of a passive solute by surfactant-driven flows
D. Haim and **L. M. Pismen**	1119	Performance of a photochemical reactor in the regime of Taylor–Görtler vortical flow
P. Skovborg and **P. Rasmussen**	1131	A mass transport limited model for the growth of methane and ethane gas hydrates
C. Buttersack	1145	Two-zone model for solid–liquid separation by filtration and expression
D. Avlonitis	1161	The determination of Kihara potential parameters from gas hydrate data
C.-L. Chiang and **Z.-R. Fang**	1175	Simulation and optimal design for the residual oil hydrodemetallation in a cocurrent moving-bed reactor
R. Chirone and **L. Massimilla**	1185	Sound-assisted aeration of beds of cohesive solids
S. V. Krishnan and **S. V. Sotirchos**	1195	Effective diffusivity changes during calcination, carbonation, recalcination, and sulfation of limestones
M. Hartman, O. Trnka, K. Svoboda and J. Kocurek	1209	Decomposition kinetics of alkaline-earth hydroxides and surface area of their calcines
Yu. A. Buyevich	1217	Fluid dynamics of coarse dispersions
Yu. A. Buyevich and **Sh. K. Kapbasov**	1229	Random fluctuations in a fluidized bed
Yu. A. Buyevich and **Sh. K. Kapbasov**	1245	Polydisperse fluidization—I. Basic equations
P. A. Langston, U. Tüzün and **D. M. Heyes**	1259	Continuous potential discrete particle simulations of stress and velocity fields in hoppers: transition from fluid to granular flow
H. K. S. Tan	1277	Analysis of cyclic fixed bed sorption processes for second-order irreversible kinetics

Number 9

K.-Y. Kwok and **S. L. Shah**	1287	Long-range predictive control with a terminal matching condition
O. Miyatake, I. Tanaka and **N. Lior**	1301	Bubble growth in superheated solutions with a non-volatile solute
S. Hartland, B. Yang and **S. A. K. Jeelani**	1313	Dimple formation in the thin film beneath a drop or bubble approaching a plane surface
G. Févotte and **J. P. Klein**	1323	Application of on-line calorimetry to the advanced control of batch crystallizers
M. Mazzotti, G. Storti and M. Morbidelli	1337	Shock layer analysis in multicomponent chromatography and countercurrent adsorption
C. Aldrich and **J. S. J. van Deventer**	1357	Identification of gross errors in material balance measurements by means of neural nets
P. Seferlis and **A. N. Hrymak**	1369	Adaptive collocation on finite elements models for the optimization of multistage distillation units

S. Rode, N. Midoux, M. A. Latifi and A. Storck	1383	Hydrodynamics and liquid–solid mass transfer mechanisms in packed beds operating in cocurrent gas–liquid downflow: an experimental study using electrochemical shear rate sensors
R. F. Hinde, Jr. and D. J. Cooper	1403	A pattern-based approach to excitation diagnostics for adaptive process control
P. M. Wilkinson, H. Haringa and L. L. van Dierendonck	1417	Mass transfer and bubble size in a bubble column under pressure
P. M. Wilkinson and L. L. van Dierendonck	1429	A theoretical model for the influence of gas properties and pressure on single-bubble formation at an orifice
I. Efthimiadu and I. P. T. Moore	1439	Phase inversion of liquid–liquid dispersions produced between parallel shearing plates
S. Manjunath, K. S. Gandhi, R. Kumar and D. Ramkrishna	1451	Precipitation in small systems—I. Stochastic analysis
		Shorter Communications
W.-J. Lu, S.-J. Hwang and C.-M. Chang	1465	Liquid mixing in two- and three-phase airlift reactors
S. Brandani	1469	The relevance of binodal curve data in ternary liquid–liquid equilibria
S. Ray, A. K. Panja and S. P. Sengupta	1472	Irreversibility analysis of a separation system using sieve tray distillation column
H. Haario and T. I. Seidman	1477	A modified film model
K. Wichterle	1480	Heat transfer in agitated vessels
		Letters to the Editors
M. Menéndez	1485	Comments on a one-parameter model of catalyst deactivation for FCC modelling
B. W. Wojciechowski	1486	Author's reply to comments by M. Menéndez
		Book Reviews
E. N. Lightfoot	1487	Heat Conduction. By M. N. Özişik
E. N. Lightfoot	1487	Transport Processes and Unit Operations. By C. J. Geankoplis
E. N. Lightfoot	1488	Absorption: Fundamentals and Applications. By R. Zarzycki and A. Chacuk

Number 10

B. Drinkenburg, S. Ottengraf and W. P. M. van Swaaij	1491	In Memoriam: Kees Rietema
J. L. Hudson and T. T. Tsotsis	1493	**Review Article Number 44. Electrochemical reaction dynamics: a review**
P. J. Scott, A. Penlidis and G. L. Rempel	1573	Reactor design considerations for gas–liquid emulsion polymerizations: the ethylene-vinyl acetate example
S. Trinh and D. Ramkrishna	1585	Feasibility of pattern formation in catalytic reactors

Book Reviews

H. Kung 2032 Computer-aided design of catalysts (Chemical Industries Series/51). Edited by E. R. Becker and C. J. Pereira

E. N. Lighfoot 2032 Coulson and Richardson's Chemical Engineering Vol. 6: Chemical Engineering Design. Edited by R. K. Sinnott

Number 13

K. B. McAuley, J. P. Talbot and T. J. Harris 2035 A comparison of two-phase and well-mixed models for fluidized-bed polyethylene reactors

D. Schulze and J. Schwedes 2047 An examination of initial stresses in hoppers

B. K. Srinivas and M. M. El-Halwagi 2059 Synthesis of combined heat and reactive mass-exchange networks

V. Natarajan, P. R. Bishnoi and N. Kalogerakis 2075 Induction phenomena in gas hydrate nucleation

J. W. Ponton 2089 Degrees of freedom analysis in process control

W. L. Holstein 2097 Performance of gas saturators in the presence of exit stream temperature gradients and implications for chemical vapor deposition saturator design

C. Kravaris, P. Daoutidis and R. A. Wright 2107 Output feedback control of nonminimum-phase nonlinear processes

S. E. Zorrilla and A. C. Rubiolo 2123 A model for using the diffusion cell in the determination of multicomponent diffusion coefficients in gels or foods

J. K. Ali, E. J. Newson and D. W. T. Rippin 2129 Exceeding equilibrium conversion with a catalytic membrane reactor for the dehydrogenation of methylcyclohexane

S. Laugier, D. Richon and H. Renon 2135 Chlorofluorohydrocarbon–alcohol mixtures: Bubble pressures and saturated liquid molar volumes (experimental data and modeling)

X. Hu, D. D. Do and G. N. Rao 2145 Experimental concentration dependence of surface diffusivity of hydrocarbons in activated carbon

P. Ding and W.-K. Yuan 2153 Inductivity heated CVD reactor for coating TiN film onto a tungsten carbide surface

R. K. Das and S. Pattanayak 2163 Bubble to slug flow transition in vertical upward two-phase flow through narrow tubes

D. H. Kim and K. S. Chang 2173 Time-domain solutions of unsteady-state mass transfer models for biporous catalyst in a continuous-flow gradientless reactor

Shorter Communications

S. Rajagopalan and J. M. Modak 2187 Heat and mass transfer simulation studies for solid-state fermentation processes

D. K. R. Nambiar, R. Kumar, T. R. Das and K. S. Gandhi 2194 A two-zone model of breakage frequency of drops in stirred dispersions

M. S. Murthy, B. R. Harish, K. S. Rajanandam and K. Y. A. P. Kumar 2198 Investigation on the kinetics of thermal decomposition of calcium carbonate

2205 *Errata*

W.-C. Hu and **I. C. Sanchez**	2815	Off-lattice NPT simulations of spherocylinder fluids
X.-Y. Chang and **K. F. Freed**	2821	Towards a molecular theory for modeling long-time polymer dynamics
R. G. Larson	2833	Molecular simulation of ordered amphiphilic phases
T. Haliloğlu and **W. L. Mattice**	2851	Monte Carlo lattice simulation of the interchange of chains between micelles of diblock copolymers
Y. L. Ha and **A. K. Chakraborty**	2859	Characterization of crown ethers as macrocyclic elements for rotaxane preparation: a Monte Carlo simulation
R. Khare and **M. E. Paulaitis**	2867	Molecular simulations of cooperative ring flip motions in single chains of polystyrene
D. J. Lacks and **G. C. Rutledge**	2881	Mechanisms for axial thermal contraction in polymer crystals: polyethylene vs isotactic polypropylene
A. Kloczkowski, M. A. Sharaf and **J. E. Mark**	2889	Computer simulations on filled elastomeric materials
S. K. Kumar, T. P. Russell and **A. Hariharan**	2899	Monte Carlo simulations of the free surface of polymer melts
D. C. Koopman, S. Gupta, R. K. Ballamudi, G. B. Westermann-Clark and **I. A. Bitsanis**	2907	Structural patterns and molecular mobility inside the interface between an fcc solid and liquid n-octane
L. F. Vega, A. Z. Panagiotopoulos and **K. E. Gubbins**	2921	Chemical potentials and adsorption isotherms of polymers confined between parallel plates
E. J. Bottani, V. Bakaev and **W. Steele**	2931	A simulation/experimental study of the thermodynamic properties of carbon dioxide on graphite
J. Dunne and **A. L. Myers**	2941	Adsorption of gas mixtures in micropores: effect of difference in size of adsorbate molecules
E. I. Segarra and **E. D. Glandt**	2953	Model microporous carbons: microstructure, surface polarity and gas adsorption
R. D. Kaminsky and **P. A. Monson**	2967	A simple mean field theory of adsorption in disordered porous materials
P. R. Van Tassel, S. A. Somers, H. T. Davis and **A. V. McCormick**	2979	Lattice model and simulation of dynamics of adsorbate motion in zeolites
Z. Jiang and **R. A. Brown**	2991	Modelling oxygen defects in silicon crystals using an empirical interatomic potential
D. Maroudas and **S. T. Pantelides**	3001	Point defects in crystalline silicon, their migration and their relation to the amorphous phase
F. A. Brotz and **J. J. de Pablo**	3015	Hybrid Monte Carlo simulation of silica

Number 18

A. G. Davidyan, V. N. Kiva, G. A. Meski and **M. Morari**	3033	Batch distillation in a column with a middle vessel

Ru-Sheng Li	3053	Steady-state multiplicity of isothermal reacting systems in a sequence of two continuous-flow stirred tank reactors
E. Alpay, C. N. Kenney and D. M. Scott	3059	Adsorbent particle size effects in the separation of air by rapid pressure swing adsorption
K. Sundmacher and U. Hoffmann	3077	Macrokinetic analysis of MTBE-synthesis in chemical potentials
F. García-Ochoa and A. Santos	3091	Effective diffusivity under inert and reaction conditions
A. E. D. M. van der Heijden, J. P. van der Eerden and G. M. van Rosmalen	3103	The secondary nucleation rate: a physical model
R. Kumar, V. G. Fox, D. G. Hartzog, R. E. Larson, Y. C. Chen, P. A. Houghton and T. Naheiri	3115	A versatile process simulator for adsorptive separations
Y.-P. Wang and R. Smith	3127	Design of distributed effluent treatment systems
D. J. Smit, W. R. Paterson and M. J. Hounslow	3147	Aggregation and gelation—II. Mixing effects in continuous flow vessels
J. Uhlemann, M. Cabassud, M.-V. Le Lann, E. Borredon and G. Casamatta	3169	Semi-batch reactor optimization and control for the epoxidation of furfural
	3193	Corrigenda

Number 19

G. J. Lye, J. A. Asenjo and D. L. Pyle	3195	Protein extraction using reverse micelles: kinetics of protein partitioning
M. Minale and G. Astarita	3205	On mass diffusion effects in a Stefan-like problem arising in the melting of Antarctic ice shelves
J. Zhou, J. R. Grace, S. Qin, C. M. H. Brereton, C. J. Lim and J. Zhu	3217	Voidage profiles in a circulating fluidized bed of square cross-section
D. Ilievski and E. T. White	3227	Agglomeration during precipitation: agglomeration mechanism identification for $Al(OH)_3$ crystals in stirred caustic aluminate solutions
Yu. A. Buyevich and I. A. Natalukha	3241	Unsteady processes of combined polymerization and crystallization in continuous apparatuses
G. H. Meeten and J. D. Sherwood	3249	The hydraulic permeability of bentonite suspensions with granular inclusions
V. Z. Yakhnin, A. B. Rovinsky and M. Menzinger	3257	Differential flow instability of the exothermic standard reaction in a tubular cross-flow reactor
S. A. Svoronos, D. Papageorgiou and C. Tsiligiannis	3263	Discretization of nonlinear control systems via the Carleman linearization

C. Frances, B. Biscans and C. Laguerie — 3269 Modelling of a continuous fluidized-bed crystallizer. Effects of mixing and segregation on crystal size distribution during the crystallization of tetrahydrate sodium perborate

N. Anand, B. G. R. Manoja and A. K. Gupta — 3277 Kinetics of adsorption on biporous solids—for a system with rectangular equilibrium—reanalysed

Chyi Hwang and Ying-Hung Chuang — 3291 Computation of optimal reduced-order models with time delay

S. Valerio and M. Vanni — 3297 Interfacial mass transfer and chemical reaction in non-ideal multicomponent systems

S. J. Sealy, D. M. Fraser, K. P. Möller and C. T. O'Connor — 3307 Equilibrium considerations in the modelling of propene oligomerization

J. K. Bandyopadhyay, S. R. Inamdar, V. Ravi Kumar and B. D. Kulkarni — 3313 Normal form analysis of a nonisothermal reaction in a CSTR

Shorter Communications

Z. Jaworski, A. W. Pacek and A. W. Nienow — 3321 On flow close to cavern boundaries in yield stress fluids

J. Köhler, T. Kuen and E. Blass — 3325 Minimum energy demand for distillations with distributed components and side-product withdrawals

B. V. Venugopal and A. Mehra — 3331 Gas absorption accompanied by fast chemical reaction in water-in-oil emulsions

Book Reviews

K. L. Bray — 3337 Properties and applications of perovskite-type oxides. Edited by L. G. Tejuca and J. L. G. Fierro

K. L. Bray — 3337 Synthetic diamond: emerging CVD science and technology. Edited by K. E. Spear and J. P. Dismukes

Number 20

L. F. Gladden — 3339 **Review Article Number 46. Nuclear magnetic resonance in chemical engineering: principles and applications**

F. Özgülşen and A. Çinar — 3409 Forced periodic operation of tubular reactors

J. A. Hogendoorn, W. P. M. Van Swaaij and G. F. Versteeg — 3421 Experimental study of the absorption of acid gases in porous particles impregnated with aqueous alkanolamine solutions

G. Weir and S. Hendy — 3439 Settling regimes for initially fluidized beds of fine powders

F. I. C. C. Pais and A. A. T. G. Portugal — 3447 Determination of the steady state of isothermal two-phase continuous stirred tank reactors

J. Wang and H. Langemann — 3457 Unsteady two-film model for mass transfer accompanied by chemical reaction

R. O. Fox, G. Erjaee and Q. Zou — 3465 Bifurcation and stability analysis of micromixing effects in the chlorite–iodide reaction

A. W. Pacek, A. W. Nienow and I. P. T. Moore — 3485 On the structure of turbulent liquid–liquid dispersed flows in an agitated vessel

L. K. Filippov 3499 Coherent and incoherent frontal patterns of multicomponent adsorption dynamics for variable linear fluid velocity in the fixed bed—I. Frontal patterns for linear adsorption isotherms

L. Dong, S. T. Johansen and **T. A. Engh** 3511 Flow induced by an impeller in an unbaffled tank—II. Numerical modelling

Shorter Communications

Zai-Sha Mao, Tian-Ying Xiong, Rong Wang and **Jia-Yong Chen** 3519 Note on the thermodynamic stability of pendular rings between solid particles

Part A (Papers on "Synthesis of new materials", "Polymerizations", "Biochemical processes", "Mixing" and "Reactors" are contained in Part B)

v Preface

1. Plenary lectures

M. E. Davis	3971	Reaction chemistry and reaction engineering principles in catalyst design
L. D. Schmidt, M. Huff and **S. S. Bharadwaj**	3981	Catalytic partial oxidation reactions and reactors
J. R. Rostrup-Nielsen, P. S. Schoubye, L. J. Christiansen and **P. E. Nielsen**	3995	The environment and the challenges to reaction engineering
J. M. Ottino	4005	Mixing and chemical reactions: a tutorial

R. Krishna and **S. T. Sie**	4029	Strategies for multiphase reactor selection
J. M. Beér	4067	Minimizing NO_x emissions from stationary combustion; reaction engineering methodology
R. Alkire and **M. Verhoff**	4085	Electrochemical reaction engineering in materials processing
		2. Kinetics
P. Čapek and **K. Klusáček**	4095	Dynamic kinetic model of the water-gas shift reaction using unsteady kinetic experiments
H. Rode, D. Orlicki and **V. Hlavacek**	4103	Reactivity, experimental strategy and reaction rate data evaluation in noncatalytic gas–solid systems
B. Ruggeri, G. Sassi and **V. Specchia**	4121	A holistic view of (bio)kinetics
W. E. Bentley, B. Kebede, T. Franey and **M.-Y. Wang**	4133	Segregated characterization of recombinant epoxide hydrolase synthesis via the baculovirus/insect cell expression system
J. Li and **A. R. P. van Heiningen**	4143	The rate process of H_2S emission during steam gasification of black liquor char
M. Neurock, A. Nigam, D. Trauth and **M. T. Klein**	4153	Molecular representation of complex hydrocarbon feedstocks through efficient characterization and stochastic algorithms
F. J. Krambeck	4179	Thermodynamics and kinetics of complex mixtures
S. C. Korre, M. Neurock, M. T. Klein and **R. J. Quann**	4191	Hydrogenation of polynuclear aromatic hydrocarbons. 2. Quantitative structure/reactivity correlations
R. Rota, F. Bonini, A. Servida, M. Morbidelli and **S. Carrà**	4211	Analysis of detailed kinetic schemes for combustion processes: application to a methane–ethane mixture
W. D. Provine and **M. T. Klein**	4223	Molecular simulation of thermal direct coal liquefaction
I. Pitault, D. Nevicato, M. Forissier and **J.-R. Bernard**	4249	Kinetic model based on a molecular description for catalytic cracking of vacuum gas oil
		3. Emission control and environmentally benign processing
F. Qin and **E. E. Wolf**	4263	Infrared thermography studies of unsteady-state processes during CO oxidation on supported catalysts
M. Foka, J. Chaouki, C. Guy and **D. Klvana**	4269	Natural gas combustion in a catalytic turbulent fluidized bed
E. Tronconi, A. Beretta, A. S. Elmi, P. Forzatti, S. Malloggi and **A. Baldacci**	4277	A complete model of SCR monolith reactors for the analysis of interacting NO_x reduction and SO_2 oxidation reactions
H. P. Calis, T. S. Everwijn, A. W. Gerritsen, C. M. van den Bleek, F. Goudriaan and **F. G. van Dongen**	4289	Mass transfer characteristics of parallel passage reactors
G. J. Kwant, W. Prins and **W. P. M. van Swaaij**	4299	Selective catalytic reduction of nitrogen oxide with ammonia in a novel reactor called "the floating gas–solid fluidized bed"
J. R. Turner, S. Choné and **M. P. Duduković**	4315	Ammonia/flyash interactions and their impact on flue gas treatment technologies

D. Hekmat and **D. Vortmeyer**	4327	Modelling of biodegradation processes in trickle-bed bioreactors
Z. Shareefdeen and **B. C. Baltzis**	4347	Biofiltration of toluene vapor under steady-state and transient conditions: theory and experimental results
L. van de Beld, M. P. G. Bijl, A. Reinders, B. van der Werf and **K. R. Westerterp**	4361	The catalytic oxidation of organic contaminants in a packed bed reactor

NOTES FOR CONTRIBUTORS

General

The journal publishes full length *Papers*, *Shorter Communications*, *Review Articles* and *Letters to the Editors*.

All contributions should conform to the Aims and Scope shown at the front of the journal. The Editors welcome contributions on new topics that fall within the broad scope of *Chemical Engineering Science*.

Papers should be complete and authoritative accounts of work which has special significance and must be presented clearly and concisely.

Shorter Communications deal with new ideas and specific points rather than developing a theme, and should not exceed the equivalent of 2000 words including illustrations and tables.

Review Articles are commissioned by the Executive Editor on the advice of the Editors. Authors wishing to submit a review article should contact an Editor or the Executive Editor.

Letters to the Editors are of two kinds. Letters commenting on work published in the journal should be sent to the Executive Editor. Letters concerned with novel and particularly interesting concepts, or giving advance results that will subsequently be reported fully in a paper, should be sent to the appropriate Editor in the same way as a paper.

Submission of Work

The attention of all intending authors is drawn to the Aims and Scope on the title page and the publication and copyright regulations on the inside front cover. Only contributions not submitted or published elsewhere can be accepted for review. Furthermore, authors must agree not to submit elsewhere a paper submitted to and accepted by *Chemical Engineering Science*. Authors should refer to the Executive Editor if they are in doubt about what constitutes publication elsewhere. Authors are responsible for the originality of their texts. Work may be submitted either to an Editor in the author's regional area or to an Editor having particular research expertise in the subject of the work. The Executive Editor will be pleased to receive submissions in cases where there is no regional allocation. The three North American regional Editors each handle papers which fall within the journal's Aims and Scope. However, authors are requested to send papers concerned with catalysis, chemical reactor engineering, kinetics and thermodynamics to Professor Bell, with mathematical modelling, process systems, separation processes and transport phenomena to Professor Brown; and with adsorption or membrane processes and related phenomena to Professor Ruthven.

Format of Contribution

All papers should be typed, double-spaced with wide margins, on one side of the pages only, in English. Three copies are required but original drawings and photographs should **not** be sent until work has been accepted for publication. Authors should submit a copy of any paper included in the references which is not yet published, e.g. "in press" or "submitted for publication". To minimize postal charges, the three copies of the paper are not in general returned to authors. Original drawings and photographs can be returned to an author if requested; otherwise these are discarded 1 month after publication.

Title and Abstract Make the title concise yet informative. The significance and achievement of each full length paper and review article should be stated in an abstract. Note that the title and abstract are used in indexing and abstracting services.

Text Technical descriptions of experimental methods should be given in detail only when such methods are new. Avoid footnotes.

Address of author It is essential that the author handling an accepted paper should keep both the Editor responsible for accepting the paper and the Publisher's Production Editor informed of any change in address.

Units SI units are required.

Notation Authors should supply a list of symbols and units used in the work.

Articles on Disk

Authors are encouraged to submit ***final and accepted*** manuscripts on disk. Two copies of the printout should always be included. Disks must be clearly marked with at least the following: Operating system, disk format (DS/DD), software package used, Authors' names, short title of the paper.

Figures, including Photographs

Original figures and photographs should only be supplied to the Editor's office when a paper has been accepted. Each figure or photograph should be clearly marked on the back with the names of the authors and the figure number.

Captions should be typed on a separate sheet.

Line-drawings should always be carefully prepared at about twice the final size, on plain white drawing paper, and suitable for direct reproduction. Laser printer output at 300 dots per inch for a two-to-one reduction on good quality paper is acceptable. Authors should take particular care to ensure that lettering on a figure will remain clearly legible after reduction.

Photographs should be enlarged sufficiently to permit clear reproduction. If words or numbers appear in photographs, two copies are required, one with the words or numbers clearly overprinted and the other without inscription.

Colour figures can be printed provided that, in the specific judgment of an Editor, the colour is essential to convey scientific information. There is no charge for the first two colour illustrations in a paper.

Tables

These will normally be typeset. Large or long tables should be typed on continuing sheets with each sheet clearly identified by the table heading and the sequence.

References

These must be listed in alphabetical order of first author, thus:

- to a book,
  Coulson, J. M., Richardson, J. F. and Sinnott, R. K., 1983, *Chemical Engineering Volume* 6 (*SI Units*), *Design*, pp. 274–304. Pergamon Press, Oxford.
- to a journal,
  Turner, J. C. R. and Murphy, T. K., 1983, A CSTR method for determining ion-exchange equilibria. *Chem. Engng Sci.* **38**, 147–153.

The former would be mentioned in the text as (Coulson *et al.*, 1983), the latter as (Turner and Murphy, 1983). If there are more than two works by authors in a given year, the letter a, b, etc. follows the date in each instance. Journal abbreviations should follow those cited in *World List of Scientific Periodicals*, 4th Edition.

Proofs, Copyright and Reprints

Proofs Corrections to proofs must be restricted to errors introduced by the printers. Authors should return their proofs promptly, by fax if the corrections are minor, to expedite publication.

Copyright Authors are requested to read the note on copyright published inside the covers of each issue. A transfer of copyright form will be sent out with the proofs of a paper. This form should be signed in the appropriate section and returned with the corrected proofs, or as soon as possible afterwards.

Reprints Authors are provided with 25 reprints free of charge. Further supplies may be ordered on the reprint order form which accompanies the proofs; reprints may be ordered with or without covers.

AVAILABLE AT YOUR FINGERTIPS:

THE ELSEVIER SCIENCE COMPLETE CATALOGUE ON INTERNET

NOW AVAILABLE:

THE ELSEVIER SCIENCE COMPLETE CATALOGUE 1995 ON CD-ROM

These catalogues feature all journals, books and major reference works from Elsevier Science. Furthermore they allow you to access information about the electronic and CD-ROM products now published by Elsevier Science. Demonstration examples of some of these products are included.

Features include:

- All the journals, with complete information about journal editors and editorial boards
- Listings of special issues and volumes
- Listings of recently published papers for many journals
- Complete descriptions and contents lists of book titles
- Clippings of independent reviews of published books
- Book series, dictionaries, reference works
- Electronic and CD-ROM products
- Demonstration versions of electronic products
- Free text search facilities
- Ordering facilities
- Print options
- Hypertext features
